

Supplementary Figure S2. Metabolites identified in principle metabolic pathways in SAMP1/kl^{-/-} and HL156A-treated SAMP1/kl^{-/-} kidneys. Detected HMT Standard Metabolites are plotted on the pathway map. The bars/lines represent the relative areas covered by each metabolite in the SAMP1/kl^{+/+} (blue), SAMP1/kl^{-/-} (red), HL156A-treated SAMP1/kl^{-/-} kidney tissues (green).
