

SUPPLEMENTARY FIGURES

Supplementary Figure 1. Evaluation of mitophagy in vehicle- and quercetin (50 μM)-treated HeLa cells expressing mt-Keima with *pink1* siRNA. Ratios indicating relative levels of mitophagy were quantified. Data are expressed as mean ± SEM. ***P* < 0.01.

Supplementary Figure 2. Changes of designated mitophagy proteins in HeLa cells with or without quercetin treatment. Data are expressed as mean ± SEM. **P* < 0.05 compared to the control.
