

SUPPLEMENTARY FIGURES

Supplementary Figure 1. Expression of 14 potential DEPs in PDAC. Expression of 14 potential DEPs in PDAC and normal pancreas tissues from TCGA and GTEx data. Three horizontal lines in the box plot represent minimum, median and maximum, respectively; * $P < 0.05$.

Supplementary Figure 2. Prognostic role of 7 potential upregulated DEPs in PDAC. (A) Prognostic role (OS) of 7 potential upregulated DEPs in PDAC. **(B)** Prognostic role (DFS) of 7 potential upregulated DEPs in PDAC.
